

Curtin University

ROBO FAIR

Friday 22 September 2017

Engineering Pavilion, Building 215
Curtin University, Bentley Campus

Curtin Engineering Outreach are proud to be hosting Curtin Robofair 2017!

Robofair is designed to engage primary and high school students in complex, strategic problem solving and higher order thinking - skills that are a priority for 21st century education. Robofair will demonstrate the intelligent information-based technology of the future: technology that is highly interactive, multi-modal, adaptive, and autonomous.

Exhibitors for Robofair includes industry, higher education and also secondary education. This is a highly interactive event and a must-do for students and community members to attend.
